

Key Instruction in Surgical Skills Course

2014

Manchester September 2014
Friday 19 th and Saturday 20 th September 2014

For Surgical Care Practitioners, Advanced Scrub
Practitioners, Nurses &
Operating Department Practitioner's

An Introduction to the Key Instruction in Surgical Skills Course

The Key Instructions in Surgical Skills course is designed for experienced Trainee Surgical Care Practitioners, Advanced Scrub Practitioners, experienced Theatre Personnel, Midwives, Casualty Personnel and covers the key principles of:

- *Key surgical techniques*
- *Tissue handling*
- *Knot Tying*
- *Suturing*

The course aims to provide an overview of the theoretical and practical knowledge, which is needed when preparing to extend many new and expanded roles.

Our intention is to provide you with a safe and systematic way of role development and extension. We see the course as a way of promoting good practice to a common standard, and we hope that you will find that it supplements and makes sense of the experience that you are acquiring day by day in practice.

The course is intensively taught, with an emphasis on individual tuition and detailed personal feedback on performance. Features of the course include:

- *Hands-on practice throughout the course*
- *Personal tuition, with a limited number of participants per course*
- *A course manual and access to a on-line webpage containing key points about each procedure*
- *Your performance is assessed, to identify areas of strength and weakness*
- *You receive feedback on your performance, and advice for future practice.*
